BC-3600
Auto Hematology Analyzer

Pleasant Experience in Hematology Testing
BC-3600
Auto Hematology Analyzer

Labs today are facing a multitude of challenges including limited laboratory budgets, increasing requirements for high quality as well as reliable products, a shortage of experienced clinicians and so on. We understand the specific needs of end users, and use them as the foundation for our new solution BC-3600. Complete with an intuitive operation system, convenient data communication interface, excellent performance, BC-3600 is a system solution for satellite labs and clinics.

- CBC+3-DIFF, 16 parameters+3 histograms
- Throughput: 60 samples per hour
- Intuitive operation system with TFT touch screen
- Enhanced performance by proven technologies
- Closed Tube Sampling
- 40,000 results storage with histograms
- High quality QC, calibrators and reagents
Intuitive and Powerful Software

The well-organized software interface eases your operation and gives you easy control of sample results, patient records, and report customizations. Shortcut menus simplify your work process and improve efficiency. Distinctive areas display WBC, RBC, and PLT results clearly. Automatic maintenance programs can be executed by double-clicking the function keys while operational errors can be removed with single clicks.

Complete Data Communication

Integrated HL7 communication protocol for LIS connection. A wide selection of interface options are available including RS232 for computer connection, USB for QC assay values upload, barcode scanner, and keyboard connection.

Intelligence and Efficiency

Efficient ZAP and flush method removes clot completely. For Closed Tube model, 3 types of tube adaptors are provided to satisfy individual laboratory needs. With the on-line reminder function, users can conveniently monitor the reagent residual volumes through the software.
Superior Reagents, Quality Controls and Calibrators

High quality original reagents, calibrators and controls offer a complete system for our users. Cyanide free reagents allow laboratories to meet necessary environmental regulations. Complete traceability system ensures closest consistency with standard methods.

High Quality Design

New internal structural design separates electronic components from the fluidic system, decreasing interference while at the same time allowing for easier maintenance.

Technical Specifications

Parameters
WBC, Lymph#, Mid#, Gran#, Lymph%, Mid%, Gran%, RBC, HGB, HCT, MCV, MCH, MCHC, RDW, PLT, MPV and histograms for WBC, RBC, PLT

Principles
Electrical impedance method for cell counting and Cyanide - free for hemoglobin

Sample Volume
Prediluted: 20μL
Whole Blood: 21μL

Throughput
60 samples per hour

Display
Large color touch screen
Resolution: 800×600

Carryover
WBC, RBC, HGB≤0.5%
PLT≤1.0%

Connectivity
4 USB ports (for external printer, software upgrade, barcode reader, keyboard and mouse), LAN port (1), RS232 (1)

Printout
Thermal recorder, 50mm width paper, various printout formats, external printer (optional)

Operating Environment
Temperature: 15°C~30°C
Humidity: 30%~85%

Power requirement
AC 100-240V, 50/60±1Hz

Dimensions
16 in(W) x 18 in(H) x 18 in(D)

Configuration
Close Tube Sampling

Weight
62 lbs
